

The Marshalls Heliophysics and Planetary Science Branch

presents

SOLAR CYCLE 25

**Thursday, February 23rd
1:00 - 3:30
Yacht Club Lower Level**

- The sun has an 11-year cycle of minimum / maximum solar activity.
- We are now entering a MAXIMUM "Solar Cycle 25"
Why should we care?
- Solar flares can affect daily life by disrupting the power grid and electronic communication.
- If the weather is good, we'll use a NASA telescope to observe the Sun in real time!

**Come hear this fascinating 1-hour presentation
followed by a generous question and answer session.**

Guest Speakers

**Mitzi Adams, MFSC-ST13
Adam Kobleski, MFSC-ST13**

**\$10 Placeholder will be refunded at the event
REGISTRATION IS REQUIRED BY FEBRUARY 17th
Last day for cancellation with refund is February 16th
Max attendance: 100**

Be Engaged. Be Informed. Be Heard.
