

NASA Tech on Earth

Friday, October 20

1:00 pm | Yacht Club

Remember 57 years ago when TANG was developed for the Gemini astronauts and soon became a staple in many modern-day kitchens? Well, NASA now has a much longer list of products improving our everyday lives in the areas of

- MEDICINE
- TRANSPORTATION
- PUBLIC SAFETY
- CONSUMER PRODUCTS
- COMPUTER TECHNOLOGY
- ENVIRONMENTAL & AGRICULTURAL RESOURCES
- INDUSTRIAL ACTIVITY

Prepare to be amazed at this fascinating 1-hour presentation by John Kelly, Project Coordinator of NASA's Marshall Space Flight Center, followed by Q&A, as he summarizes how space exploration has impacted and continues to improve our life here on Earth. From advancements in healthcare and agricultural resources to computer technology and transportation, NASA's contributions have had a major economic impact by creating businesses and jobs that originated from space exploration. Some things you may not even realize!
