

Glass "Lampwork" Demonstration July 22 at 11 am Tugaloo Pavilion

Lampworking, also known as flameworking or torchworking, is a type of glasswork in which a torch is used to melt the glass. Once in a molten state, the glass is formed by blowing and shaping with tools and hand movements. This glass making technique is used to create glass sculpture and artwork, beads, jewelry, ornaments, and small figurines.

On July 22nd at 11 am, local artist Jo Marie Brotherton will demonstrate how she creates beads and sculptural flowers using a torch (oxygen, gas mix), rods of colorful glass and some simple tools. She will discuss the mysteries of lampworking.
