***Silent Sky**, written by Lauren Gunderson, tells the true story of 19th-century astronomer Henrietta Leavitt, an amateur astronomer who transcended her post as a Harvard "computer" (data entry clerk) to make significant observations on the universe and influence the work of Edwin Hubble, among others, and explores a woman's place in society during a time of immense scientific and heart-bound discoveries. **Silent Sky** is the poignant tale of a woman's dedication to the stars, and the human touch that makes life under the vast sky beautiful and timeless. Henrietta and her female peers changed the way we understand both the heavens and Earth.*
